Target version:		Affected Architecture:	amd64
Affected Version:	2.4.4		

Description

I did an upgrade from 2.4.3 to 2.4.4 and recieved a bunch of errors for APCUPSD,

Crash report begins. Anonymous machine information:

amd64

11.2-RELEASE-p1

FreeBSD 11.2-RELEASE-p1 #61 349c67ad08d(RELENG_2_4_4): Sat Aug 11 18:14:44 EDT 2018

root@buildbot3:/builder/crossbuild-ce-master/obj/amd64/FWJoMRHc/builder/crossbuild-ce-master/pfSense/tmp/FreeBSD-src/sys/pfSense

Crash report details:

PHP Errors:

[13-Aug-2018 02:44:29 Asia/Kolkata] PHP Warning: Illegal string offset 'vip' in /usr/local/pkg/pfblockerng/pfblockerng.inc on line 912

No FreeBSD crash data found.

History

#1 - 08/14/2018 09:15 AM - Jim Pingle

- Assignee set to Jim Pingle

I'll take this, I need to look over the UPS packages anyhow.

#2 - 08/14/2018 10:55 AM - Jim Pingle

- Status changed from New to Feedback

Errors relevant to apcupsd are now fixed in commit:6b631073482b (apcupsd pkg version 0.3.91_4)

Tested and working, mail notifications did not cause any PHP errors.

#3 - 01/12/2019 09:01 PM - James Dekker

There is no way to test this, without an instance of pfSense already running 2.4.3 **with** apcupsd already installed.

```
WARNING: Current pkg repository has a new PHP major
version. pfSense should be upgraded before
installing any new package.
```

Failed

#4 - 01/12/2019 09:15 PM - Jim Pingle

It wasn't really the upgrade that did anything. Only need to test apcupsd on 2.4.4 or later to make sure there are no errors.

#5 - 02/01/2019 06:44 PM - James Dekker

- Status changed from Feedback to Resolved

Got it. Tested on 2.4.5.a.20190201.0810 with apcupsd version 0.3.91_4, no issues.
