

pfSense Docs - Correction #8854

[feedback form] Define Broadcast Domain and switch loops

08/29/2018 04:35 PM - Jared Dillard

Status:	Resolved	Start date:	08/29/2018
Priority:	Normal	Due date:	
Assignee:	Jim Pingle	% Done:	100%
Category:	Networking	Estimated time:	0.00 hour
Target version:			
Description			
Page: https://docs.netgate.com/pfsense/en/latest/network/broadcast-domains.html			
Feedback: The section tells what a Broadcast Domain is, but not what its for, what problem it solves, why you need one, and why every network block has one. It says one should avoid switch loops, but doesn't define them, tell why they are bad, or how to correct them,.			

History

#1 - 09/23/2020 02:31 PM - Jim Pingle

- Description updated

#2 - 11/17/2020 02:58 PM - Jim Pingle

- Status changed from New to Resolved

- % Done changed from 0 to 100

I rewrote the page and added links to pages with more information (rather than repeating it all there).

#3 - 11/17/2020 03:21 PM - Jared Dillard

I left a couple comments on the commit in GitLab.

#4 - 11/18/2020 01:23 PM - Jim Pingle

Comments are addressed, should be OK now.
