

pfSense - Bug #8981

Uncheck DHCP registration does not clear entries

09/30/2018 09:45 PM - Ender L

Affected Version:			

Description

Uncheck the DHCP registration box in Unbound setting GUI should clear the contents of `/var/unbound/dhcpleases_entries.conf` to stop resolving these hostnames. Uncheck static entries should also update `host_entries.conf`. The current behavior is that these files leave untouched and unbound continue to resolve these hostnames.

@Gertjan has provided a fix, would like to see this ported into official release:
