- Assignee set to Jim Pingle

#2 - 10/19/2018 11:43 AM - Jim Pingle

- Project changed from pfSense to pfSense Packages

- Category set to ntop

- Assignee changed from Jim Pingle to Renato Botelho

It's actually already at 3.6 on 2.4.5 snapshots, and trying to pick back changes proved to be a bit of a challenge. It appears to rely on other bigger changes (gcc7, newer devel/json-c) so I'm not sure this is something we want to do on its own.

Assigning to Renato to see what he thinks. It looks like it might be OK but will take some manual version bumps of ndpi and ntopng between some other cherry-picks to pull it in, assuming it will work without also pulling in the newer gcc7 and json-c.

It may have to wait for the next time we switch that branch to a newer quarterly branch, or 2.4.5.

#3 - 11/01/2018 07:38 AM - Renato Botelho

- Subject changed from update ntoping 3.6.0 to update ntopng 3.6.0

#4 - 11/01/2018 08:07 AM - Renato Botelho

- Status changed from New to Feedback

#5 - 11/01/2018 08:07 AM - Renato Botelho

json-c upgrade was not necessary since we don't have plans to import a new quarterly to 2.4.4 branch.

#6 - 11/08/2018 12:55 AM - Vladimir Lind

- File ntopng.png added

On 2.4.5-DEVELOPMENT (arm) built on Mon Nov 05 15:36:37 EST 2018 FreeBSD 11.2-RELEASE-p4:
I don't see activity map on ntopng - see attached pic.

#7 - 11/08/2018 10:17 AM - Jim Pingle

- Status changed from Feedback to Resolved

The activity map is not relevant to this ticket, only the version, which appears to be OK.

FYI: ntopng disabled the activity map by default. [They say](#) running ntopng with --enable-flow-activity brings it back but I'm not seeing that happen. If I can get that to work I'll add a GUI knob for it, but that's a topic for a separate ticket.

oh , ok .

yes we want activity map capability again . thank you .

ntopng appears to have removed all of that code. It went from enable-flow-activity to enable-flow-scripts to enable-user-scripts and now all that code is gone.

There is no reference to activity map in a live script in the current code.

If you want that back, take it up directly with ntopng.
