Affected Version:	2.0		

Description

As reported here:

<http://forum.pfsense.org/index.php/topic.28233.0.html>

Toggleing the checkbox for Prefer older IPsec SAs doesn't stick. It looks like it does, but if you navigate away from the page and back again, it stays checked.

Also on my test VM, no matter how I checked/unchecked the box, the sysctl was stuck at the 0 value.
