<b>Affected Version:</b>			

#### Description

It would be great to define policies based on active directory / LDAP or local users and groups.

Also for this to work flawless a crawler that searches for logins on domain controllers event log or via WMI on client computers would be great.

in my opinion this is one of the last features pfsense is missing to deal with other big firewall vendors.

Thanks!

#### History

**#1 - 08/14/2019 12:38 PM - Jim Pingle**

- *Category set to Rules / NAT*

- *Status changed from New to Rejected*

Firewall rules based on network client users aren't on our radar right now. If it does happen, it's a long ways off and would be a massive change tracked a different way.
