pfSense - Bug #9166

Failed loading extensions

12/04/2018 02:16 PM - Ivan Cabrera

Status:	Not a Bug		**Start date:**	12/04/2018
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:			**Estimated time:**	0.00 hour
Target version:				
Plus Target Version:			**Affected Version:**	2.4.4_1
Release Notes:			**Affected Architecture:**	amd64

Description

Hi, I updated to the latest version 2.4.4 release P1, and I'm getting these errors:

PHP Warning: Failed loading Zend extension 'opcache.so'

(tried: /usr/local/lib/php/20131226/opcache.so (Cannot open "/usr/local/lib/php/20131226/opcache.so"), /usr/local/lib/php/20131226/opcache.so.so

I've attachaed a file with the log file, I'll appriciate your help.

History

#1 - 12/04/2018 02:18 PM - Jim Pingle

- Status changed from New to Not a Bug

- Priority changed from High to Normal

Please read the upgrade guide. Looks like normal errors that happen during the upgrade from a version <= 2.4.3 to >= 2.4.4. Post on the forum for assistance if that is not the case, but there is no bug here.
