<b>Target version:</b>	2.5.0		
<b>Affected Version:</b>	All	<b>Affected Architecture:</b>	All

#### Description

When using the azure v6 dynamics dns update there is an issue that the dns entry is showing up at the azure dns management website but the value of the dns entry is null.

The problem is that the json request body contains a wrong property. It has to be "AAAARecords" instead of "AaaaRecords" in the file /src/etc/inc/dyndns.class line 1103.

The issue is already fixed with the following pull request on github:

<https://github.com/imp3r4t0r/pfsense/tree/patch-1>

#### History

##### #1 - 04/18/2019 07:10 AM - Jim Pingle

- Project changed from pfSense Packages to pfSense
- Category set to Dynamic DNS
- Target version set to 2.5.0
- Affected Version set to All
- Affected Architecture set to All

PR: <https://github.com/pfsense/pfsense/pull/4064>

##### #2 - 05/30/2019 11:54 AM - Renato Botelho

- Status changed from New to Feedback
- Assignee set to Renato Botelho
- % Done changed from 0 to 100

PR has been merged. Thanks!
