

pfSense - Bug #9326

Clearing states for specific IP won't work

02/14/2019 01:23 PM - Flole Systems

Status:	Duplicate	Start date:	02/14/2019

Target version:		Affected Architecture:	
Affected Version:			

Description

When I use the Webinterface to filter for a specific IP and then click on "clear all states" they are still staying there. Deleting each state individually is working though.

Also it seems like clearing states on WAN IP change is not working properly, possibly related to this.

History

#1 - 02/14/2019 02:42 PM - Tim Harman

Everyone can just guess which version you're reporting this against?

#2 - 02/14/2019 02:46 PM - Flole Systems

It's been in there since quite a while, I never reported it though. It's definitely in 2.4.4-RELEASE-p1.

#3 - 02/14/2019 02:50 PM - Chris Linstruth

Please do not report bugs from anything but the current version, which is 2.4.4-p2.

#4 - 02/14/2019 03:29 PM - Flole Systems

I checked the changes and found nothing that could fix this behaviour and considered all the changes not worth updating, but I can do that later today, I don't think it will solve the issue but I will try that.
