Target version:	2.5.0	Affected Architecture:	amd64
Affected Version:	2.5.0		

Description

On current 2.5.0 snapshots, systems may see the following error at boot time:

```
PHP Warning: scandir(/boot/dtb/overlays): failed to open dir: No such file or directory in /etc/inc/util.inc on line 2174
PHP Warning: scandir(): (errno 2): No such file or directory in /etc/inc/util.inc on line 2174
```

Thus far I have only seen it on amd64.

To me, I have a fix ready.
