

pfSense Packages - Bug #9557

FRR Upgrades

05/28/2019 11:05 AM - Jim Pingle

Status:	Resolved	Start date:	05/28/2019
Priority:	Low	Due date:	
Assignee:	Renato Botelho	% Done:	100%
Category:	FRR	Estimated time:	0.00 hour
Target version:		Affected Architecture:	All
Affected Version:			

Description

FRR 6.0.x seems to be OK on pfSense 2.5.0, so we need to play a bit of musical FRR upgrades:

- Copy FRR 6.0.x back to pfSense 2.4.4-p3
- Copy the current pfSense FRR package back to pfSense 2.4.4-p3 since it contains necessary changes for FRR 6.0.x
- Move pfSense 2.5.0 snapshots to FRR 7. This is in the ports tree under net/fr7 but it is not in the quarterly branch used by pfSense 2.5.0, so it needs some work to import

If there is a blocking issue in the pfSense 2.4.4 ports tree which makes the upgrade to 6 not viable, that part can be skipped and we can still move pfSense 2.5.0 up to FRR 7.

History

#1 - 05/31/2019 10:15 AM - Renato Botelho

- Status changed from New to Feedback
- Target version set to 2.5.0
- % Done changed from 0 to 100

2.4.4 now uses FRR 6.x and 2.5.0 moved to 7.x

#2 - 05/31/2019 01:38 PM - Jim Pingle

pfSense 2.4.4 is using FRR 6 as expected. Still waiting on a new snapshot to check on pfSense 2.5.0/FRR 7

#3 - 06/01/2019 05:28 PM - Jim Pingle

- Status changed from Feedback to Resolved

2.5.0 snaps have FRR 7 now and it appears to be running OK

#4 - 09/23/2019 01:14 PM - Jim Pingle

- Target version deleted (2.5.0)
