

pfSense - Bug #9763

Trying to set VLAN Priority causes error

09/14/2019 10:58 AM - Flole Systems

Status:	Resolved	Start date:	09/14/2019
Priority:	Normal	Due date:	
Assignee:	Jim Pingle	% Done:	100%
Category:	Web Interface	Estimated time:	1.00 hour
Target version:	2.4.5		
Affected Version:	All	Affected Architecture:	All

Description

I used to have a rule with VLAN Prio set to VOICE since a few years (so this rule was there during the upgrade to current pfsense aswell). Now I wanted to edit a few parameters on that rule and got "Invalid VLAN Prio Set." even though I didn't change anything related to VLAN Prio (I just switched from Destination Port any to a specific one and from Source Port specific one to any). Once I set VLAN Prio to "Not set" I was able to save it, but now I can no longer set it to anything else as I will get "Invalid VLAN Prio Set." everytime.

Someone else reported the same issue here:
