

pfSense Packages - Bug #9922

haproxy_version does not use full path to haproxy, leads to errors when run during cron

11/25/2019 08:41 AM - Jim Pingle

Status:	Feedback	Start date:	11/25/2019
Priority:	Normal	Due date:

Category:	haproxy	Estimated time:	0.00 hour
Target version:		Affected Architecture:	All
Affected Version:	All		

Description

When /etc/rc.filter_configure_sync is run from cron, it yields errors from haproxy. For example in this simulated run:

```
: env PATH=/etc:/bin:/sbin:/usr/bin:/usr/sbin /etc/rc.filter_configure_sync
sh: haproxy: not found
sh: haproxy: not found
sh: haproxy: not found
sh: haproxy: not found
```

The culprit is haproxy_version() which does not use the full path to haproxy:

```
$haproxy_version = shell_exec("haproxy -v | head -n 1 | awk '{ print $3 }');
```

To me, I have a fix pending.
